TrendyStickers Introduces High-Quality Scandinavian Designed Wallstickers to the United Kingdom

Copenhagen, Denmark, 8. September, 2009 – Wallstickers have been a resounding success in Scandinavia and now the time has come to introduce this unique concept in interior design to the United Kingdom. TrendyStickers has launched a new and improved .co.uk website specifically targeted at the UK market with new designs, features and special offers.

The TrendyStickers philosophy is that it should be easy to decorate. With TrendyStickers you can in a simplistically modern way change a boring atmosphere to something filled with character and style in the palette of your choice - fitting your mood and lifestyle. TrendyStickers wallstickers are self-adhesive stickers made of a very thin high-tech vinyl foil. It only takes minutes to apply to a surface and it can be just as easily removed again. This means that when you feel like a change, you can easily change motif and colors in a snap. You can apply TrendyStickers to almost any surface such as painted wallpaper, windows, tiles, doors, plaster, mirrors, tables, chairs, refrigerators – your imagination is the only limit!

"We are hoping that our 'Scandinavian invasion' of the UK market will be just as successful as our Viking ancestors were. We are excited to bring our high-quality product to the UK – and judging from the customers we have already had buying from our website, then the Brits are just as mad about Wallstickers as the Danes and Swedes" Said Babak Azadali, CEO TrendyStickers.

TrendyStickers manufactures all wallstickers in-house which means they can offer an enormous range of designs in a multitude of colors and sizes. Currently they offer all standard designs in 3 to 6 different sizes and 19 different colors. This solidifies their position as one of Europe's largest manufacturers of wallstickers

In addition to hundreds of stylish motifs TrendyStickers now offers an extensive quote database with thousands of famous quotes in English which can be made as a wallsticker. This enormous database combined with the easy-to-use designer system where customers can choose between a variety of fonts, 19 different colors and 6 different sizes results in an almost endless variety of wallstickers.

"Quotes & Proverbs is our fastest growing product category after we put in the additional effort to make it easier and faster for our customers to customize their own quotes – and find those delightful and clever ones in our database. It's a great way to spend an afternoon!" Said Babak Azadali, CEO TrendyStickers.

TrendyStickers was founded in early 2008 and has rapidly expanded the selection of stylish designs. Growth has been enormous throughout the last year and due to the rapid success they are continuously expanding their web presence to more countries in the EU region.
